

We hope you enjoy the Open Azure Day digital SWAG!

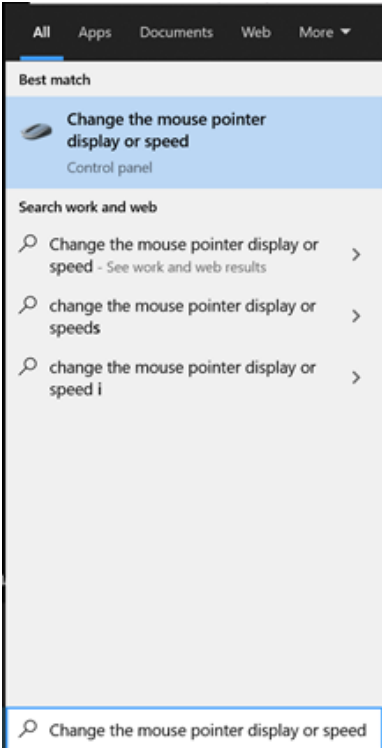

Here is how to change your mouse cursor and Teams background

Change a single mouse cursor (Windows)

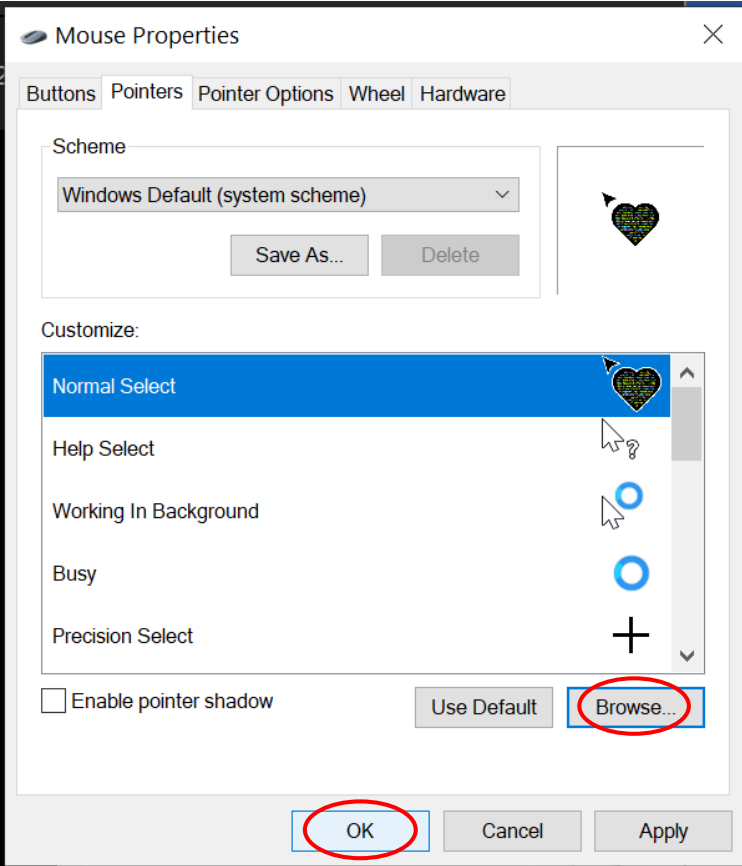

1. Push the **Windows Key**, type **Change the mouse pointer display or speed** into the Windows search box, and press **Enter**.

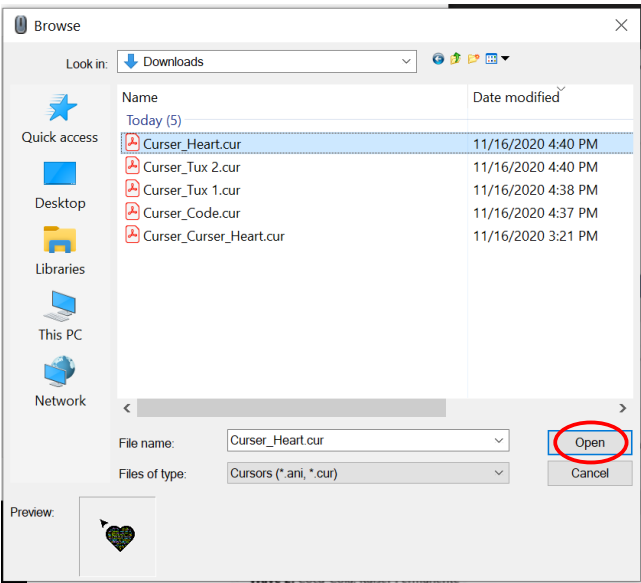

2. In the Mouse Properties window that appears, click the **Pointers** tab.

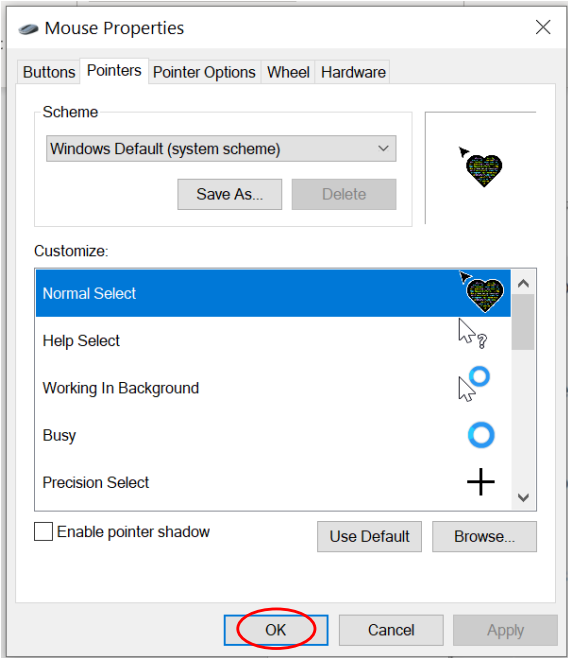

3. On the Pointers tab, click **Normal Select** pointer and click **Browse**.

4. Select the cursor you'd like to change it to and then click **Open**.

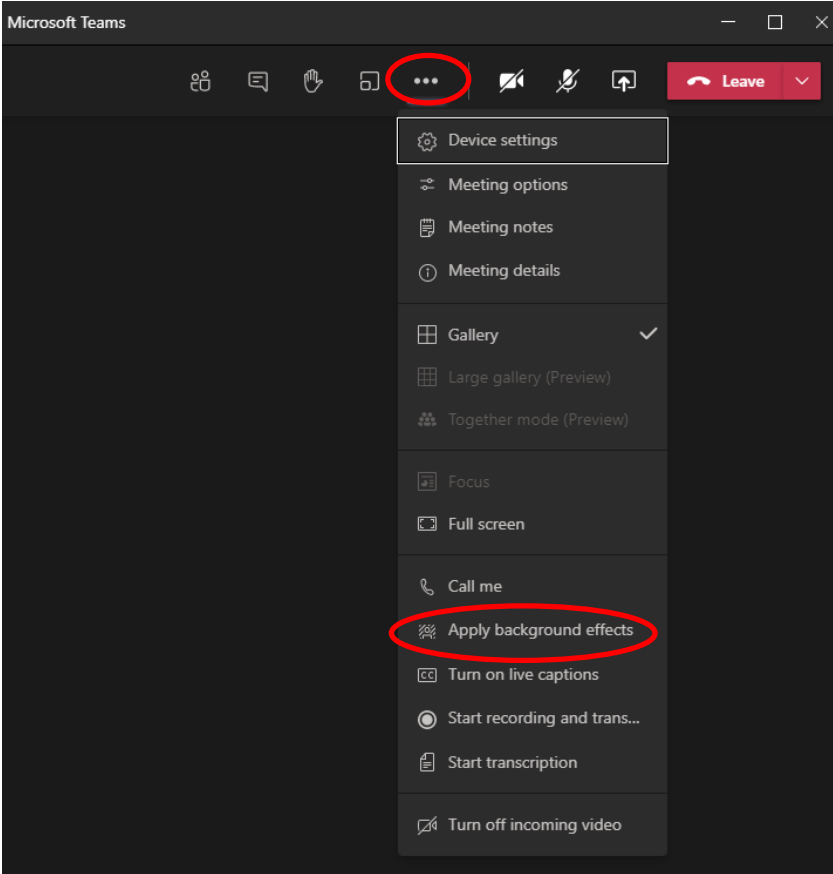

5. Click **Apply** and then **OK** to save your changes

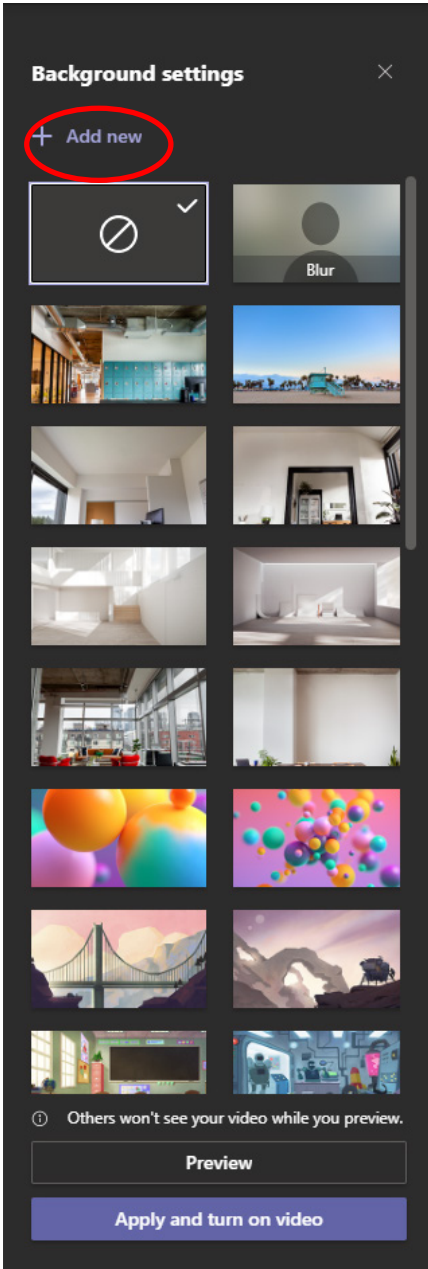

To change your mouse back to Normal Select, follow steps 1-2, and select Normal Select then click Apply and OK to save changes.

Change your Microsoft Teams background

1. In Microsoft Teams, click the top **three dots** and select **Apply background effects**

2. Select **Add new** and select the Teams background you'd like to use from the location you saved it to on your computer

3. Click **Apply** and turn on video
